EDUCATION

- **Western Carolina University** Cullowhee, NC
Bachelor of Science in Computer Science Feb. 2022 – May. 2026
- **Relevant Coursework:** Software Development, Operating Systems, Linux Tools, Data Structures, Discrete Mathematics, Linear Algebra, Calculus I-III

KEY SKILLS

Languages: Python, Rust, Java, C, C#, SQL, JavaScript/Typescript, HTML, CSS
Frameworks: .NET, Node.js, React, Vite/Vike, Angular, Django
Developer Tools: Git, GitLab, CI/CD Pipelines, Docker, Jira, VS Code, Rider, IntelliJ, Vim
General Practices: Object-Oriented Programming, Databases, Debugging, Security Practices

PROFESSIONAL EXPERIENCE

- **ITPIE 1099 Consultant** August 2024 - Current
VAE, Inc. Springfield, VA
 - Led the migration from Newtonsoft.Json to the more modern .NET System.Text.Json library.
 - Contributed to transitioning the platform from a traditional controller-based API to the new .NET Minimal API architecture.
 - Participated in exploratory work evaluating AI tooling for developer productivity and potential application features.
- **ITPIE Internship** May 2024 – August 2024
VAE, Inc. Springfield, VA
 - Contributed to a full-stack development team utilizing a CI-CD pipeline, near full coverage testing, and a rigorous review process.
 - Improved code quality and consistency by enforcing C#/ .NET code analyzers across a large codebase.
 - Supported development of a network discovery and reporting tool listed on the DISA APL and deployed across multiple DoD sites.
- **Building Manager Lead** May 2023 – August 2024
Western Carolina University Cullowhee, NC
 - Trained Building Managers individually on required operational and customer-service skills.
 - Authored and maintained a comprehensive operating manual for Building Manager responsibilities.
 - Assessed team members' time-management and performance effectiveness to support operational improvements.
- **Building Manager** March 2022 – May 2023
Western Carolina University Cullowhee, NC
 - Provided frontline support and assistance for guests and students visiting the University Center.
 - Monitored building activity and maintained accurate headcounts during facility rounds.
 - Assisted with technical setup for events and student activities.
 - Awarded Student Worker of the Month (February 2023) for exceptional service.

PROJECTS

- **Scramble** | *Django, Python, HTML, CSS*

Personal Project

- Developed a Django-based word game allowing players to compete for daily high scores.
- Implemented score comparison against other users for daily challenges.
- Created a seed-based random game generator enabling users to share and replay identical game sets.

- **Progranimate** | *React, Typescript, Vite/Vike, Node.js*

Capstone Project (Team of 3)

- Contributed to a multi-semester inherited codebase, improving stability and feature completeness.
- Built a web platform that teaches Python by visualizing program execution as a step-through graph alongside traditional code.
- Developed tools enabling instructors to create and assign programming exercises to student groups.
- Implemented support for exercise constraints, such as requiring a specific number of loops or operations.

- **4 Player Chess Program** | *Java*

School Project (Team of 4)

- Built a multiplayer chess application supporting up to four simultaneous players.
- Designed and implemented all interface graphics using JavaFX.

- **Secure Peer to Peer Communication** | *Python*

School Project done solo

- Implemented a TCP-based peer-to-peer secure messaging application.
- Integrated certificate verification, RSA signing, and AES encryption to ensure full security.
- Delivered guarantees of authenticity, non-repudiation, and confidentiality through layered cryptographic design.
